

KEERTHIKA SUNDAR

Business Intelligence Developer | Power BI and DAX | SQL Analytics | Financial and Supply Chain Analytics

keerthikasundar1921@gmail.com | +91 77088 41219 | Chennai, Tamil Nadu

[LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven MBA graduate specializing in Data Analytics and Supply Chain Management with hands-on experience designing end-to-end BI and SQL analytics solutions. Advanced proficiency in Power BI (DAX, Power Query, interactive dashboards), SQL, and Python. Experienced in financial reporting, KPI design, SLA tracking, data modeling, and translating complex datasets into actionable business narratives for finance, logistics, and IT stakeholders. Certified in KNIME Analytics; Google Data Analytics Professional Certificate in progress.

TECHNICAL SKILLS

Power BI: DAX measures and calculated columns, Power Query (M), interactive dashboards, drill-through, custom visuals, KPI cards, anomaly highlighting, predictive analytics integration

SQL and Data Modeling: Advanced querying, joins, aggregations, window functions, subqueries, performance tuning; Snowflake data warehouse concepts; star and snowflake schema design

Programming and Integration: Python (Pandas, data preparation, ETL support); scripting for BI pipeline integration and data transformation

Version Control and Documentation: Git and GitHub; GitLab workflows for version control, documentation traceability, and team collaboration

Analytics Platforms and Tools: KNIME Analytics (Level 1 Certified); Google Data Analytics Coursera (In Progress); Excel (Pivot Tables, VLOOKUP, SUMIF, advanced charts)

Domain Expertise: Financial reporting and forecasting, supply chain analytics, pricing analysis, inventory management, SLA dashboards, operational KPIs, subscription pricing models

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Dec 2025 – 2026

VDart | Trichy, Tamil Nadu

- Monitored and analyzed Power BI SLA tracking dashboards to support operational accuracy, compliance reporting, and timely issue resolution, directly mirroring financial and logistics BI reporting workflows.
- Managed end-to-end document management and audit process workflows, ensuring data traceability and governance standards consistent with BI documentation best practices.
- Analyzed subscription-based pricing model strategies and supported feature enhancement planning; communicated findings to cross-functional stakeholders via structured data storytelling.
- Collaborated with operations and IT teams to validate data outputs and iterate on dashboard solutions, gaining hands-on BI requirements gathering and stakeholder management experience.

Junior Data Analyst – Pricing

2024 – 2025

UCAL Exports | Chennai, Tamil Nadu

- Engineered customer quotations and supplier RFQs using pricing data models, maintaining 100 percent data integrity across sales and procurement records, directly applicable to financial BI reporting.
- Performed confirmed order analysis, Proforma Invoice validation, and order reconciliation; structured datasets underpinning KPI tracking dashboards and financial performance reports.
- Automated pricing workflows through rate logic enhancements and defect resolution, boosting efficiency and reducing documentation turnaround time significantly.
- Collaborated cross-functionally with sales and procurement stakeholders to enforce pricing consistency; developed data storytelling and communication skills for non-technical audiences.

Operations Intern

2024 – Jan 2025

Fresh2Day | Chennai, Tamil Nadu

- Applied Just-In-Time inventory strategies with real-time data tracking, building experience in supply chain analytics and operational KPI monitoring relevant to logistics BI environments.
- Identified and implemented process improvements alongside cross-functional supply chain teams, demonstrating the collaborative approach central to BI stakeholder engagement.

KEY ANALYTICS PROJECTS

Swiggy Data Analysis – SQL — *SQL | Advanced Querying | Business Intelligence*

<https://github.com/keerthisundar222/Swiggy-Data-Analysis-Using-SQL>

- Performed end-to-end SQL analysis on Swiggy restaurant and order data, writing advanced queries with joins, aggregations, window functions, and subqueries to surface actionable business insights from relational datasets.
- Analyzed key business metrics including order trends, restaurant performance, cuisine popularity, and delivery patterns; translated raw data into structured BI-ready insights mirroring logistics and financial reporting workflows.
- Demonstrated SQL data modeling and query optimization skills directly applicable to Snowflake-based BI pipelines and financial data engineering at scale.

BlinkIT Real-Time Sales Dashboard — *Power BI | DAX | Power Query*

<https://github.com/keerthisundar222/blinkIT-Real-Time-Data-Project-Power-BI>

- Built interactive Power BI dashboard with advanced DAX measures and Power Query transformations to analyze real-time sales, customer satisfaction, and inventory health; tracked KPIs including total revenue, average sales, items sold, and customer ratings to deliver actionable inventory optimization insights.

Sales Performance Dashboard — *Power BI | Data Modeling | Power Query*

<https://github.com/keerthisundar222/Sales-Performance>

- Engineered dynamic revenue dashboard evaluating product-level performance and regional sales distribution; applied Power Query for data accuracy and reliability; built financial storytelling visuals supporting executive decision-making.

India General Election 2024 – Data Visualization — *Power BI | Multi-Source Data Modeling*

<https://github.com/keerthisundar222/Party-Alliance-Indian-general-election-2024-dashboard>

- Built drill-down visualizations across multi-source electoral datasets with robust data modeling; delivered comparative insights at national and state levels demonstrating scalable BI architecture design skills.

Meta Ad Performance Dashboard — *Power BI | Data Governance | Metadata Management*

<https://github.com/keerthisundar222/Meta-AD-Performance-Dashboard-Facebook-Instagram>

- Governed metadata, conducted systematic data profiling, and documented data attributes, lineage, and relationships to improve analytical transparency; skills directly transferable to GitLab documentation and workflow traceability requirements.

Airline Ticket Price Analysis & Prediction — *Python | Pandas | Scikit-learn | Data Visualization*

github.com/keerthisundar222/-Airline-Ticket-Price-Analysis-Prediction

- Performed end-to-end exploratory data analysis and predictive modeling on airline ticket pricing data using Python (Pandas, Matplotlib, Seaborn); built a linear regression model to forecast future ticket prices by year and visualized seasonal pricing trends across cabin classes and holiday seasons.

EDUCATION

MBA – Supply Chain Management and Data Analytics

GPA: 9.48 / 10.0

PSG Institute of Management | Northern Kentucky University | 2023 – 2025

B.Com – General

CGPA: 8.05 / 10.0

Bishop Heber College | Bharathidasan University | Graduated May 2023

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- KNIME Analytics Platform – Level 1 Certification (Completed)
- Google Data Analytics Professional Certificate – Coursera (In Progress)
- Masters in Data Analytics – Fita Academy (Completed)
