

KEERTHIKA SUNDAR

Data Analyst | Business Intelligence | Supply Chain Analytics

keerthikasundar1921@gmail.com | +91 77088 41219 | Pudukkottai, Tamil Nadu | [linkedin.com/in/keerthisundar](https://www.linkedin.com/in/keerthisundar) | github.com/keerthisundar222

PROFESSIONAL SUMMARY

Results-driven MBA graduate (GPA: 9.48/10) specializing in Data Analytics and Supply Chain Management with 1+ year of hands-on experience delivering end-to-end analytics solutions. Proficient in Power BI, SQL, Excel, and Python with a proven track record of building interactive dashboards, automating pricing workflows, and driving data-driven decisions. Seeking a Data Analyst / BI Analyst role where I can leverage my domain expertise in supply chain and pricing analytics to deliver measurable business impact.

TECHNICAL SKILLS

Data Visualization: Power BI (Power Query, DAX, Interactive Dashboards), Excel (Pivot Tables, VLOOKUP, SUMIF, COUNTIF, Charts)

Programming & Query: SQL (Data Querying & Manipulation), Python (Pandas, Data Modeling – Beginner)

Analytics Platforms: KNIME Analytics (Level 1 Certified), Google Data Analytics – Coursera (In Progress)

Domain Expertise: Supply Chain Analytics, Pricing Analysis, Business Intelligence, Inventory Management, KPI Design

Tools: Canva, Microsoft Office Suite, GitHub

PROFESSIONAL EXPERIENCE

Data Analyst Intern | VDart, Trichy, Tamil Nadu

Dec 2025 – Present

- Monitored SLA tracking dashboards to ensure operational accuracy, compliance reporting, and timely issue resolution across business units.
- Gained hands-on experience with PORTRECS workflows, audit processes, and end-to-end document management protocols.
- Contributed to feature enhancement planning and supported analysis of subscription-based pricing model strategies to optimize revenue.

Junior Data Analyst – Pricing | UCAL Exports, Chennai, Tamil Nadu

Jan 2024 – Dec 2024

- Engineered accurate customer quotations and Supplier RFQs, reducing pricing turnaround time and improving documentation accuracy across sales and procurement teams.
- Maintained 100% data integrity between sales and supplier records through confirmed order analysis, Proforma Invoice validation, and order data reconciliation.
- Spearheaded automation of rate logic enhancements and defect resolution, boosting overall pricing workflow efficiency by streamlining repetitive processes.
- Collaborated cross-functionally with sales and procurement stakeholders to enforce pricing consistency and ensure timely supplier communication.

Operations Intern | Fresh2Day, Chennai, Tamil Nadu

Jun 2024 – Jan 2025

- Optimized warehouse operations including goods inspection, stock reviews, and SKU placement, improving space utilization and inventory flow.
- Applied Just-In-Time (JIT) inventory strategies and maintained real-time data tracking to enhance inventory coordination and minimize stockouts.
- Partnered with cross-functional supply chain teams to identify and implement process improvements, driving measurable operational efficiency gains.

EDUCATION

MBA – Supply Chain Management & Data Analytics | PSG Institute of Management | Northern Kentucky University, Tamil Nadu *2023 – 2025*

GPA: 9.48 / 10.0 | Dual degree program with international affiliation

KEY PROJECTS

BlinkIT Real-Time Sales Dashboard — Power BI, Power Query, DAX

- Built interactive dashboard to analyze sales performance, customer satisfaction ratings, and inventory health across multiple product lines.
- Tracked KPIs including total revenue, average sales, items sold, and customer ratings; delivered inventory optimization insights enabling data-driven decisions.

GitHub: github.com/keerthisundar222/blinkIT-Real-Time-Data-Project-Power-BI

Sales Performance Dashboard — Power BI, Power Query

- Engineered dynamic revenue dashboard evaluating product-level performance and regional sales distribution for strategic decision-making.
- Transformed raw datasets using Power Query to ensure data accuracy, consistency, and reliability; highlighted critical KPIs and growth opportunities.

GitHub: github.com/keerthisundar222/Sales-Performance

Meta Ad Performance Dashboard — Facebook & Instagram Analytics

- Structured metadata governance to enhance data accessibility; conducted data profiling to detect and resolve inconsistencies across ad performance metrics.
- Improved analytical transparency by documenting data attributes, lineage, and relationships to support marketing decision-making.
